

# Isotherm

24. November 2025

## Automation Software Engineer (m/f)

**Do you have power and are you target- and service-orientated? If software development is also your passion, then your new team is looking forward to meeting you.**

Isotherm AG is an internationally active technology company based in Uetendorf (CH) and a leading supplier of dosing and mixing systems for processing polyurethane and other reaction mixtures as well as application technology and engineering services.

Our production systems prove themselves every day in tough industrial use by customers on all continents. Our recipe for success is innovative strength, quality and reliability. To strengthen our motivated team, we are looking for a committed person to join us immediately or by arrangement as a...

### Your exciting responsibilities

- Developing software solutions in control and automation technology
- Object-oriented conception, implementation, and testing of automation software and HMI
- Programming according to modern standards and with current technologies
- Commissioning in Uetendorf, occasionally on-site at customer locations worldwide
- Troubleshooting via remote diagnostics, but also on-site in some cases

### What you bring

- Completed degree in electrical engineering, automation, mechatronics, or mechanical engineering
- Experience in control and automation technology, ideally Beckhoff; Saia knowledge is a plus
- Enthusiasm for modern software development and current hardware technologies
- Reliability, honesty, and loyalty – for you, team spirit means responsibility and open communication

- German and English are your everyday working languages – they won't feel foreign to you

### **What we offer**

- Internationally active and established SME with modern working conditions
- Work environment characterized by trust, transparency, and fairness
- Challenging tasks with high personal responsibility
- Open company culture where honesty and openness are lived values
- Attractive employment and social benefits

You can expect a field of activity with a high degree of personal responsibility and the necessary freedom for personal initiative.

Are you our new team member? We look forward to receiving your application, which we will of course process confidentially.
